project case study

Indoor soccer complex

University of Manitoba - Winnipeg, Manitoba

With two full size soccer fields inside this building, the University of Manitoba chose compact laminate to provide a full rainscreen assembly. This project incorporated full size (XL - 4100 mm x 1850 mm) sheets to minimize the required labour, and to maximize the rainscreen's capabilities.

ARCHITECT

Stantec

CONTRACTOR

Bird Construction

SCOPE OF WORK

Compact laminate -
Full rainscreen
