Trevoise Maintenance Facility

Pennsylvania Turnpike Authority, USA

ARCHITECT

Vitetta Architects

Contact: Mr. Chris Dardis

CONTRACTOR

Supreme Ceilings

SCOPE OF WORK

Custom compact laminate lap siding profiles complete with custom iClad aluminum sub-structure

With humble beginnings in the 1950's, the Pennsylvania Turnpike Authority embarked on a renewal program for the maintenance buildings across the state. The prime consultant, Vitetta Architects, chose compact laminate, as well as a custom iClad lap siding assembly to fulfill the design intent the state required. This wonderful design was fabricated to minimize the amount of onsite labour. It has long-term durability, and minimal maintenance is required.
